

Plant Adaptations to Life in a Desert

When it's hot outside, people drink more water to make up for all the water they sweat out. Plants also need water to survive, and hot desert plants are super savvy at getting water and keeping it inside them.

In this lesson we will learn about hot and cold deserts and the amazing adaptations that plants in hot deserts have to survive in some of the harshest conditions on Earth.

First – Look at the Adaptation Presentation

Then - You can become a **Desert Detective** and **Desert Super Sleuth** by playing the matching games.
